### SUMMARY

Full-stack web developer (Front-end oriented) experienced in JavaScript-based programming with a passion for creating innovative projects.

### TECHNICAL SKILLS

JavaScript, HTML, CSS, React.js, Redux, Node.js, EJS, MongoDB, PostgreSQL, AJAX/JSON, GIT

### TECHNICAL PROJECTS

- **FeelEat App** - [Github](#) | [Demo](#)  
Interactive recipe web app based on a current mood. I have used React with Redux Toolkit. On the server side, I have used Node.js with Express and PostgreSQL for the Database. Moreover, I used JSON Web Token and encrypted passwords to authenticate the users.
- **Calendar Todo List App** - [Github](#) | [Demo](#) **1st place in the Developers Institute Hackathon**  
Utilized LocalStorage for storing user data while using HTML, CSS, and JavaScript for manipulating the data
- **Nutrition Data App** - [Github](#) | [Demo](#)  
implementation of a full-stack application using Node.js while connecting to the client-side by fetching the data from the server, using NutritionX API for displaying, and storing the user's data on PostgreSQL
